

WE'RE UP FOR THE CHALLENGE

Making the complex simple

SRG Global is an engineering-led global specialist asset maintenance, mining services and construction group built to solve complex problems across the entire asset lifecycle.

We live for the challenge

SRG Global is an engineering-led global specialist asset services, mining services and construction group built to solve complex problems across the entire asset lifecycle.

SRG Global was born out of Australia's greatest ever engineering and construction challenge, the Snowy Mountains Hydro-electric Scheme, in 1961. Today, we are an ASX listed company bringing a unique engineering mindset to every construction, maintenance and mining project we touch.

Our specialist technical capabilities, diversified services and global experience working on iconic skyscrapers, bridges, dams, structures, transport infrastructure, mining and oil and gas projects, means there is no complex challenge we can't resolve.

Working across the entire asset lifecycle, we provide bespoke engineer, construct and sustain solutions, meaning you only ever need one partner. We're also self-performers because our team incorporates every discipline and skill required to meet the challenges our customers set.

Few specialist services companies have amassed the same knowledge, developed as many innovations or worked on as many world-class projects as we have. As a result, we have some of the best technical minds and problem solvers, supported by a culture that encourages out of the box thinking and people working together to push boundaries on what's considered possible.

We are also relentless in the way we deliver. We know that people's lives depend on us executing with absolute precision, which is why we never compromise on our systems, processes and safety standards.

We are SRG Global and we're up for the challenge.

How we make the complex simple

We are problem solvers. We take on the projects that others find too complex, too much of a challenge or too difficult, and we solve them across the entire asset lifecycle.

We can put our specialist expertise to work on one particular construction, maintenance or mining challenge you have, or we can bring the combined expertise and capability of the SRG Global Group to provide you with an end-to-end Engineer, Construct and Sustain solution.

This may mean exploring advanced structural alternatives, rethinking traditional methods, adapting proven technologies from other sectors, or pioneering the application of new materials and products.

End-to-end solutions

**Specialist technical expertise,
services and products across the entire
asset lifecycle, across the world.**

What we stand for

Our success won't be determined by our capability. We have the capability.

What's going to make the difference is how we live and breathe the SRG Global Way.

The principles that guide how we act as an organisation each and every day:

Live for the challenge; Smarter together; Never give up; Have each other's backs.

Live for the challenge

We live to solve problems and have the courage to challenge the status quo and what's considered possible.

Smarter together

Individually, we're all pretty smart but when we pool our resources and work together as one, we're capable of taking on the world.

Never give up

**We're doers. We are resilient and relentlessly pursue excellence in everything we do.
100% accountability, zero excuses.**

Have each other's backs

We're stronger as one team. We look out for each other and keep each other out of harm's way.

Making maintaining, restoring and accessing critical assets easier

What we do

We bring engineering know-how, the skilled workforce and the access solutions to make sustaining buildings, structures and industrial plant easier.

We not only come up with smart solutions to your asset maintenance and repair challenges, we also do the work – diagnosing, protecting, cleaning, repairing, strengthening and monitoring buildings, structures and industrial plant.

As an asset owner this means you can deal with just one contractor, which significantly reduces the time and complexity of the task. A contractor with the diverse technical know-how, the workforce and all the access equipment needed to sustain or extend the life of any critical asset.

FIXED PLANT MAINTENANCE

- Mechanical
- Electrical
- Plumbing
- Shutdowns

ACCESS SOLUTIONS

- Scaffold Hire
- Scaffold Installation
- Rope Access
- Material Hoists

INDUSTRIAL SERVICES

- Industrial Cleaning
- Paint & Blast
- Non-Destructive Testing (NDT)
- Insulation and Lagging

REMEDICATION

- Protective Coatings
- Waterproofing
- Concrete Repair and Strengthening

REFRACTORY

- Refractory Maintenance
- Installation of Refractory
- Refractory Construction and Repair

Key projects

Bringing our full resources to daily mining challenges

What we do

SRG Global is the only drill and blast contractor that can also offer an integrated range of complementary technical services to significantly improve safety and productivity on your mine site.

Working in the gold and precious metals, coal and iron ore mining sectors across Australia, SRG Global brings a uniquely adaptive approach to drilling and blasting, driven by our engineering heritage.

We are flexible in how we work, execute drilling programs with precision and respond confidently to challenges that arise in the open pit each day. It's part of who we are to continually investigate safer and more innovative ways of working, and to re-engineer our machines to optimise performance for each customer's mine site and minimise handling and risks to personnel.

We also provide our valued clients with technology services customised to suit individual project requirements such as remote control drilling equipment or high precision GPS instruments.

Constructing complex infrastructure

What we do

There are few infrastructure projects that can't be improved through our engineering-led thinking, combined with our ability to self-perform everything we do.

SRG Global's civil team specialises in the construction of road, rail and pedestrian bridges, wind farm foundations, cryogenic tanks, water tanks and silos, as well as dam strengthening, load handling, heavy lifting and bridge maintenance and restoration.

We deliver a lifetime of quality without sacrificing safety or cost-effectiveness. Decades of experience across all kinds of iconic infrastructures have allowed us to develop the innovative techniques and specialised tools needed to make any infrastructure project less complex.

Taking the complexity out of building

What we do

We can provide a fully-integrated structural, post-tensioning and facade construction solution to streamline your building project.

SRG Global have worked on some of the world's most challenging building projects. From groundbreaking skyscrapers such as the Emirates Tower in Dubai, to major hospitals, shopping centres, bridges, roads and other critical infrastructure across the world. We provide a comprehensive package that includes, solving problems around how to construct more efficiently and cost effectively, to specialist technical expertise, innovative technology and equipment and a highly skilled, competent workforce.

Clever products backed by smart advice

What we do

We design, manufacture and supply advanced construction and ground support products for improved productivity, cost and safety, and better structural integrity.

The right facade materials, fixings, ground anchors, post-tensioning and reinforcement products are crucial to the structural integrity of the project, whether it's a skyscraper, a bridge, or mining infrastructure.

SRG Global's operational expertise and experience in commercial and civil construction, combined with our decades of engineering experience, means we know how to design and manufacture products that out-perform in real-world situations, and under all kinds of conditions.

Most of all, we have the technical people to help answer all your design and installation questions, so you can be confident you're using the right product for the right application.
