

ASSET SERVICES

Making maintaining, restoring and accessing critical assets easier

We live for the challenge

SRG Global is an engineering-led global specialist asset services, mining services and construction group built to solve complex problems across the entire asset lifecycle.

SRG Global was born out of Australia's greatest ever engineering and construction challenge, the Snowy Mountains Hydro-electric Scheme, in 1961. Today, we are an ASX listed company bringing a unique engineering mindset to every construction, maintenance and mining project we touch.

Our specialist technical capabilities, diversified services and global experience working on iconic skyscrapers, bridges, dams, structures, transport infrastructure, mining and oil and gas projects, means there is no complex challenge we can't resolve.

Working across the entire asset lifecycle, we provide bespoke engineer, construct and sustain solutions, meaning you only ever need one partner. We're also self-performers because our team incorporates every discipline and skill required to meet the challenges our customers set.

Few specialist services companies have amassed the same knowledge, developed as many innovations or worked on as many world-class projects as we have. As a result, we have some of the best technical minds and problem solvers, supported by a culture that encourages out of the box thinking and people working together to push boundaries on what's considered possible.

We are also relentless in the way we deliver. We know that people's lives depend on us executing with absolute precision, which is why we never compromise on our systems, processes and safety standards.

We are SRG Global and we're up for the challenge.

Making maintaining, restoring and accessing critical assets easier

What we do

We bring engineering know-how, the skilled workforce and the access solutions to make sustaining buildings, structures and industrial plant easier.

We not only come up with smart solutions to your asset maintenance and repair challenges, we also do the work – diagnosing, protecting, cleaning, repairing, strengthening and monitoring buildings, structures and industrial plant.

As an asset owner this means you can deal with just one contractor, which significantly reduces the time and complexity of the task. A contractor with the diverse technical know-how, the workforce and all the access equipment needed to sustain or extend the life of any critical asset.

FIXED PLANT MAINTENANCE

- Mechanical
- Electrical
- Plumbing
- Shutdowns

ACCESS SOLUTIONS

- Scaffold Hire
- Scaffold Installation
- Rope Access
- Material Hoists

INDUSTRIAL SERVICES

- Industrial Cleaning
- Paint & Blast
- Non-Destructive Testing (NDT)
- Insulation and Lagging

REMEDIATION

- Protective Coatings
- Waterproofing
- Concrete Repair and Strengthening

REFRACTORY

- Refractory Maintenance
- Installation of Refractory
- Refractory Construction and Repair

Key projects

Fixed Plant Maintenance

Providing multidisciplinary trade support to maintain critical assets

SRG Global has experienced industry professionals who are multi-disciplined and can offer innovative maintenance solutions. By working in partnership with our clients, we analyse the project and allocate the best-fit multi skilled team members to ensure cost and efficiency savings without compromising on quality and safety.

Our high retention rate and local or regional team structures mean we know our workers and their level of proficiency, enabling us to match their skills to your needs more accurately. Matching this with SRG Global's entire fleet of equipment, means SRG Global is your best choice for packaged maintenance solutions.

Mechanical

SRG Global provide specialised mechanical maintenance, repair, refurbishment and improvement services to fixed plant across the mining and resources industries.

Our services include:

- Structural, mechanical , piping

- Electrical and instrumentation
- Shutdowns
- Site Welding / Boilermakers
- Mechanical Installations and alignments.

Electrical

SRG Global's electrical contracting division works principally within the resources sector as well as for commercial and industrial clients. We pride ourselves on being an innovative, flexible and responsive long-term partner to our major clients, whilst remaining a loyal and committed supplier to many smaller enterprises.

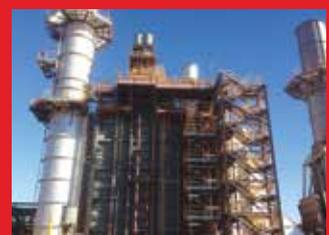

Our services include:

- Industrial electrical installation services
- Air conditioning installation and maintenance
- IT and data cabling, communications and security system provision
- Labour hire and shutdowns
- Underground cabling and conduit systems
- Substations, switch-yards and switch-room installations
- Trenching
- High Voltage (HV) cable installations, joins and terminations.

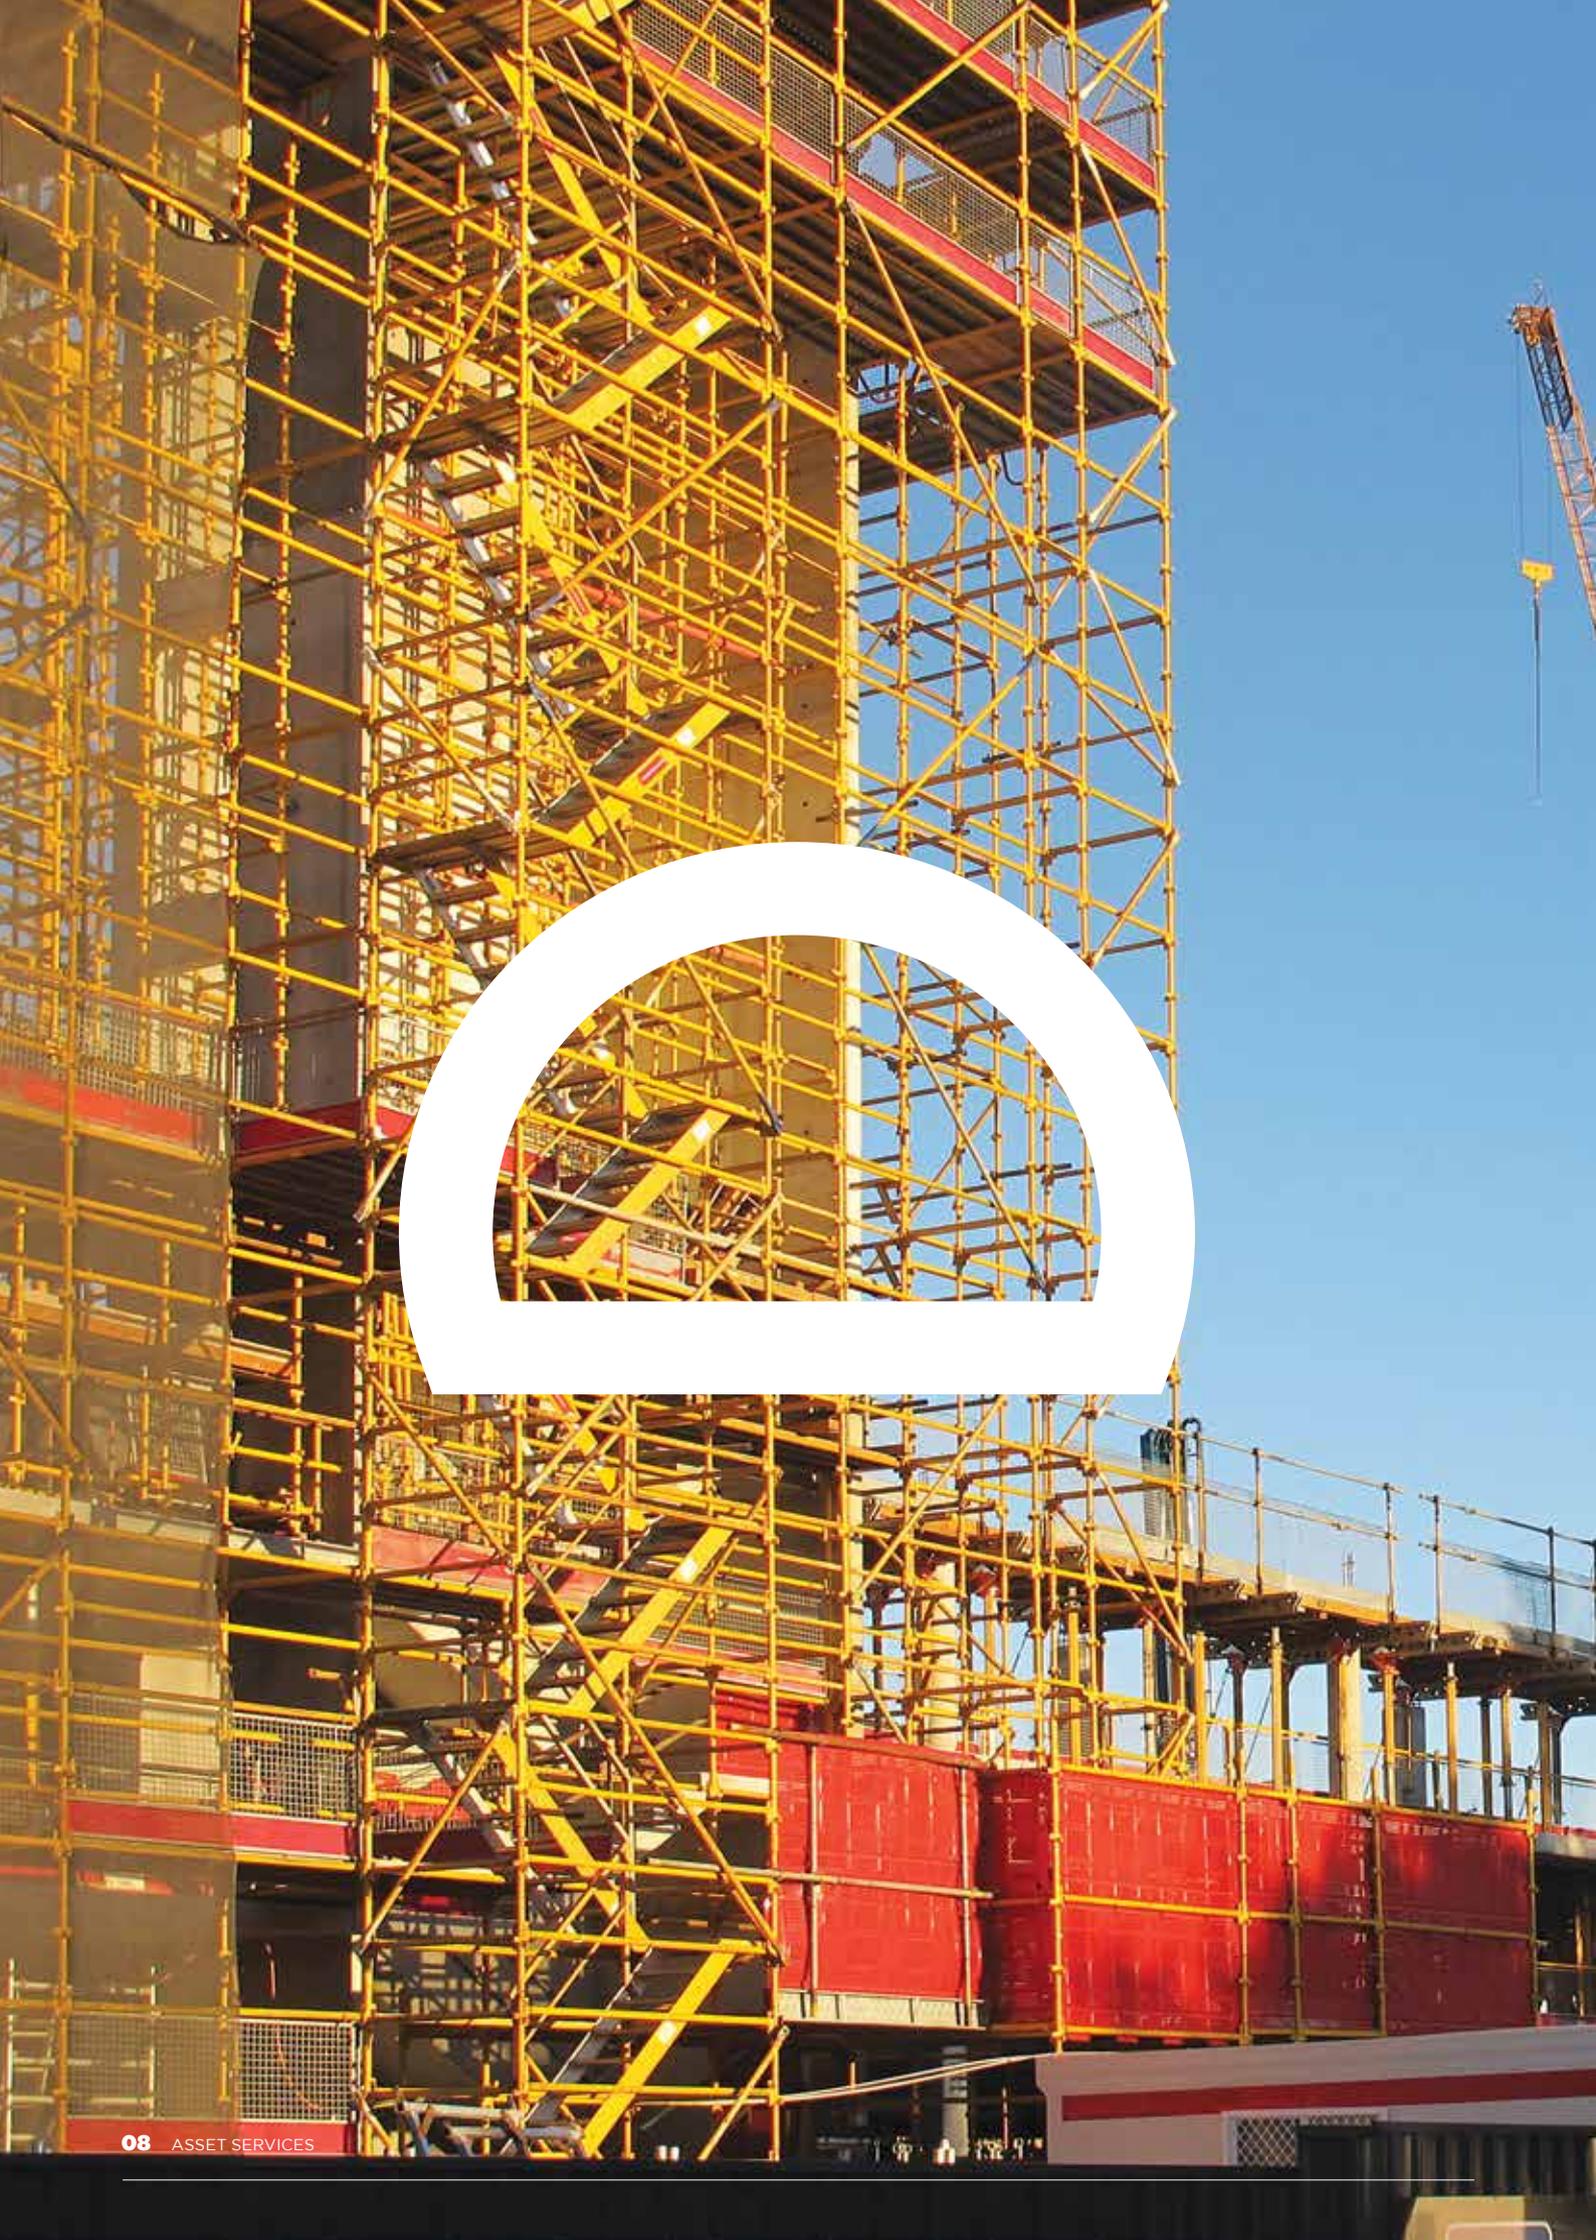

Plumbing

SRG Global provide plumbing maintenance and installations in a heavy industrial environment.

- Preventative maintenance on client assets such as safety showers, eye wash stations, hot water systems, sumps and drainage, water mains, backflow prevention devices, fire hydrants, water filters, site toilets and urinals, site showers and basins
- New installations including water main upgrades and repairs, safety shower and eyewash installations, water supply to offices and crib huts, hot water system replacement and installation of backflow prevention devices, urinal and toilet replacement and install

Access Solutions

Overcome any access challenge

As a leading supplier and contractor of scaffolding and access solutions, we have the engineering skills, qualified and experienced personnel, and material resources to tackle even the most complex access challenge.

We can design and supply scaffolding to any type and scale, as well as swing stages and mechanical access, and provide rope access as an alternative to fixed scaffold. Large scale management packages for major projects in the oil and gas, resource or industrial sectors, include supply, storage, stock management, transport and maintenance of scaffold material at remote offshore and onshore locations.

Scaffold Hire and Installation

SRG Global has extensive experience in safely and efficiently erecting temporary scaffold structures. With a team of experienced designers we can meet any requirement.

We provide:

- Modular scaffold (Kwikstage)
- Ringlock scaffold
- Tube and clip
- Aluminium scaffold including altrex rolling towers, folding units and spandek.

Material Hoists

SRG Global provide a range of hoists from 100kg through to 3 tonne including material hoists, combi lifts and winches.

Rope Access

SRG Global has a team of experienced and trained rope access technicians who are available to provide a range of services on difficult to access structures or locations where scaffolding and other access solutions are too costly or not practical.

Aligned to internationally recognised standards through membership of IRATA, SRG Global employs comprehensive safety and quality management systems for the use of rope access techniques across drilling, geotechnical, industrial and construction projects.

Industrial Services

Streamlining the job of preventative maintenance

SRG Global has expansive capabilities across all aspects of industrial services, particularly mineral processing and heavy manufacturing facilities.

Tasks such as ultra high-pressure water blasting, refractory management and materials handling normally require several different contractors to handle each element of the job. SRG Global is unique in that we can self-perform almost every facet of preventative maintenance, including shutdown planning, access, industrial cleaning and rectification works.

We work quickly and efficiently, and when problems are encountered we have the engineering mindset and capability to overcome them without the need for outside intervention. The result is a safer and more cost-competitive service.

Industrial Cleaning

SRG Global has extensive experience providing safe and efficient high industrial cleaning services throughout Australia and New Zealand. Specialising in high pressure cleaning and vacuum loading our technicians are highly trained and experienced in managing these hazardous operations safely and in an

environmentally conscious manner. SRG Global can provide safe and environmentally sound hydrocarbon removal with our 3A rated self-contained vacuum loading trucks, ensuring the safety to both our client's assets and our own employees.

Paint & Blast

SRG Global has extensive experience in abrasive blasting, waterblasting and protective coatings with operations spanning over 50 years.

Our abrasive blasting and protective coatings services are undertaken throughout Australia and New Zealand.

Our extensive range of mobile plant allows us to carry out field operations wherever they may be located.

A number of our Managers, Supervisors, Blasters and Painters are either NACE or ACA qualified coatings inspectors, providing peace of mind for our clients in the knowledge that quality is 'built in'.

SRG Global can provide the following industrial coatings services:

- Abrasive blasting
- Industrial painting and protective coatings
- Off site and on site capabilities
- Corrosion removal and surface protection.

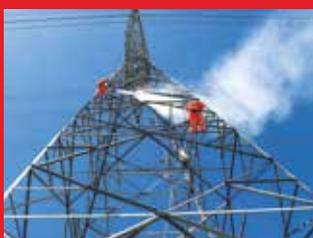

Non-Destructive Testing (NDT)

SRG Global are NATA Accredited to complete multiple methods of Non-Destructive Testing (NDT) providing a complete inspection solution tailored to suit any environment or scope.

NDT covers a diverse range of techniques designed for assessing the integrity of materials, most typically metals. Applications include evaluating compliance of fabricated items with material specifications and identifying degradation which can occur during the service life of equipment or structures.

Insulation and Lagging

SRG Global carries out insulation and lagging projects ranging from small thermal pipe insulation through to complete tank insulation projects. These works include heat exchange, personal protection insulation and cryogenic lagging.

Remediation Services

Extending the life of your asset

Our decades of experience across every kind of building project means we can devise a specialist maintenance and protection program for structures of any size, material or age. At any stage of the asset's life cycle we can blast clean and restore exterior surfaces, apply protective coatings waterproofing, and paint. We have also developed specialised techniques and products for architectural and facade restoration, structural crack repair, and ongoing monitoring. Ancillary services such as traffic management, site security and HSE management can also be included, so that clients need only make one call to set the process in motion.

Protective Coatings

SRG Global has extensive experience in all aspects of protective coatings. Services undertaken and our extensive range of mobile plant allows us to carry out field operations wherever the location.

We have an extensive range of

cleaning and preparation equipment from standard air abrasive blasting, ultra high pressure (UHP) water jetting through to specialist power tools.

Waterproofing

SRG Global are highly experienced in waterproofing installation. Our total independence from product suppliers guarantees that we always specify the system to best suit the project. All works are meticulously planned and supervised by highly trained personnel ensuring industry leading quality standards.

Concrete Repair and Strengthening

SRG Global are leaders in the repair and strengthening of concrete structures.

Concrete deterioration causes serious problems for many structures ranging from the smallest residential complex to large commercial buildings and civil structures. SRG Global has the expertise to not only accurately diagnose such problems but to repair the concrete with skill and expediency.

Services include:

- Concrete spalling repair
- Render repair
- Crack repair by full depth epoxy injection
- Treatment and/or replacement of corroded reinforcement
- Cathodic protection
- Protective coatings
- Carbon fibre strengthening

SRG Global provide end to end solutions for structural strengthening works including specialist skills, design expertise, product knowledge, access solutions and full-time project management to ensure strengthening works achieve design code compliance with minimal disruption to the ongoing use of the structure.

Refractory Services

Delivering high quality refractory maintenance services

SRG Global is a leading provider of refractory maintenance services, consistently delivering projects on-time and with an excellent safety performance.

SRG Global carry out work for the cement, chemical, pulp and paper, steel, aluminium, dairy, meat, timber and petrochemical industries as well as for crematoriums, boiler and glass manufacturers, brickworks and primary and secondary smelters.

Installation of Refractory

SRG Global provide technical disciplinary specialists who are experienced in all methods of refractory and anchor applications. Our refractory services include the design, supply, construction, installation, and maintenance for all refractory linings as well as corrosion

protection, abrasion protection, acid protection material supply, refractory material supply and the process and supply of vermiculite.

Our installation methods include:

- Formwork design and installation
- Precast shapes
- Brick manufacturing
- Insitu monolithic applications for casting, shotcrete and gunning
- Fire brick installation
- Insulation brick installation
- Installation of wear resistant linings
- Acid resistant linings, brickwork and membranes
- Plastic ramming
- Ceramic fibre module installation
- Gunning refractory
- Casting of refractory materials
- Over coating
- Installation of all types of refractory anchor designs

Refractory construction and repair

Our refractory division offers a comprehensive range of refractory services from minor repair through to large construction projects with an experienced team of specialists including:

- Inspection services (API 936 inspectors)
- Inspection reports and scope development
- Contract maintenance and pre-planning
- Design of refractory linings
- Design of all types of refractory anchoring systems
- Refractory consultancy
- Quality control
- Final MDR Reports
